

RXP-100™

The new Elvex® RXP-100 Prescription Ready Safety Frame can be fitted with prescription safety lenses for individual vision correction with ANSI Z87.1-2010+ protection.

Nosepiece with CoreFlex™ Technology provides a custom fit

Pantoscopic angle adjustable temples

RXP-100™

Contemporary design with removable Plano lens that can be replaced with your prescription.

Product Features:

- Clear lens carrier accepts Prescription Safety lenses and provides wraparound protection.
- Removable Brow Cushion provides added protection from falling particles.
- Ratcheting temple adjustments allow Pantoscopic angle adjustment for customized fit on a wide range of facial shapes.
- CoreFlex™ Technology in the nosepiece allows wearer to bend and shape the nosepiece for a comfortable customized fit.
- Stylish frame comes fitted with 2.0mm polycarbonate Plano lenses making it a ANSI Z87.1-2010+ compliant safety glass.

Other Key Product Features

- Soft over molded temples with a semi-drop design for a secure comfortable fit.
- Meets ANSI Z87.1-2010+ high impact protection.

How It Works

To have your prescription lenses inserted into the safety frame, take the RXP-100 frame to your eye doctor or optometrist. They will trace the eyewire of the frame and edge your prescription lens to fit the frame.
